## Overview: Spring 2023 Enrollment Estimates

Community college enrollment grew slightly this spring (up 0.5\%, 22,000 students from spring 2022; see Table 1), after large declines in the previous two years. A growing number of younger students, primarily dual enrolled high school students and freshmen, contributed to the uptick. Undergraduates at public and private nonprofit fouryear institutions are still declining but at slower rates ( $-0.5 \%$ and $-0.2 \%$, respectively; see Table $\mathbf{2}$ ).

After pandemic-driven declines began to level off last fall, overall undergraduate enrollment remained stable for the spring term as well ( $-0.2 \%,-25,000$ students). In comparison, graduate-level enrollment is faring more poorly ( $-2.2 \%,-68,000$ students from spring 2022; see Table 2), eroding pandemic-associated gains. Total postsecondary enrollment remains well below pre-pandemic levels, down about 1.09 million students overall and about 1.16 million undergraduates alone, compared to spring 2020 (see Table 1).

Freshmen grew 9.2 percent from spring 2022, building on a similar increase reported last year (see Table 12). Percent increases in spring freshmen are based on a far smaller scale than fall, however. Community colleges account for the majority of spring freshmen (53.9\%) and had the largest increases of any sector (+12.4\%). The community college freshman class is now 7.0 percent larger than spring 2020 levels.

Undergraduate-level students are shifting the types of credentials they pursue, with enrollments in bachelor's degree programs falling more steeply than associate's ( $-1.4 \%,-114,000$ students versus $-0.4 \%,-15,000$ students) and other undergraduate credentials showing enrollment growth ( $+4.8 \%,+104,000$ students; see Table 2). Graduate-level enrollment drops are almost entirely due to losses in master's programs (-57,000 students).

Continuing the trend from fall 2022, younger students are driving community college enrollment growth, specifically an 8.0 percent increase in dual enrolled high school students ( $+49,000$ students under age 18), and a 1.1 percent increase in 18 - to 24 -year-old enrollment ( $+24,000$; see Table 4). Over the longer term, the median age of a community college student has dropped by more than a year since 2019 (down 1.2 years from 20.7 to 19.5 for men and 1.3 years from 20.4 to 19.1 for women; see Table 6), with enrollment under 18 growing by 13.6 percent and each of the two older age groups declining much more steeply (-22.5\% for age 18-24; -25.7\% for age over 24).

Female enrollment declined by 1.2 percent ( $-118,000$ students) while male enrollment grew by 0.4 percent ( $+25,000$ students; see $\mathbf{T a b l e} \mathbf{7}$ ). The latest gender results extend the trend of an improved enrollment outlook for men relative to women, first seen in the second pandemic year (fall 2021), particularly at community colleges where male enrollment increased by 2.7 percent this spring (+45,000 students),

Nearly all states follow the national trend, with slowing declines, stabilization, or growth over last spring. Both multi-state institutions and primarily online institutions (POIs), which are not included in individual states, regained the enrollments they lost last year, returning to spring 2021 levels (see Table 8a). State-level enrollment estimates are also available by institution sector (see Table 8b).

Computer science undergraduate programs at four-year institutions reached their highest rate of growth in three years ( $+11.6 \%,+62,000$ students) in spring 2023. At two-year institutions, computer science enrollments are now above pre-pandemic levels, reversing three years of flat or declining numbers ( $+9.7 \%,+20,000$ students). Healthcare and education program enrollments continued to fall across two- and four-year institutions alike (see Tables $\mathbf{9}$ \& 10).

## Overview: Spring 2023 Enrollment Estimates

Current Term Enrollment Estimates Report Series is published every January and May by the National Student Clearinghouse Research Center. It provides national enrollment estimates by degree level, institutional sector, enrollment intensity, age group, gender, major field as well as state-level enrollment estimates. Starting in fall 2020, state-level enrollment data are also shown by institution sector.

Enrollment estimates are adjusted for Clearinghouse data coverage rates by institutional sector, state, and year. This differs from the Stay Informed report series that is designed to quantify the effects of COVID-19 by analyzing year-over-year percentage change in unadjusted, preliminary data for fixed panels of institutions that reported data in the same month each year across all comparison years.

The estimated enrollment numbers presented in the CTEE report may differ from the results of the Stay Informed reports due to the difference in methodology and institution coverage. Postsecondary institutions actively submitting enrollment data to the Clearinghouse account for 97 percent of the total enrollments at Title IV, degree-granting institutions in the U.S.

Past editions of the Spring CTEE report omitted students without valid identifiers in the Clearinghouse's data. We have included these students in the current edition and previously published results going back to 2019 have been re-estimated (see additional details in the Methodological Notes section).

Figure 1. Percent Change in Enrollment from Previous Year by Institutional Sector: 2019 to 2023

* PABs - Primarily Associate Degree Granting Baccalaureate

Table 1. Estimated National Enrollment by Institutional Sector: 2019 to 2023

| Sector | Spring 2019 | Spring 2020 |  | Spring 2021 |  | Spring 2022 |  | Spring 2023 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Enrollment | Enrollment | \% Change from Previous Year | Enrollment | \% Change from Previous Year | Enrollment | \% Change from Previous Year | Enrollment | \% Change from Previous Year |
| Total Enrollment (All Sectors) | 18,462,601 | 18,241,819 | -1.2\% | 17,806,853 | -2.4\% | 17,246,157 | -3.1\% | 17,153,317 | -0.5\% |
| Public 4-year | 7,320,541 | 7,304,540 | -0.2\% | 7,279,789 | -0.3\% | 7,190,063 | -1.2\% | 7,133,267 | -0.8\% |
| Private nonprofit 4-year | 3,976,158 | 3,952,713 | -0.6\% | 3,936,652 | -0.4\% | 3,891,344 | -1.2\% | 3,853,405 | -1.0\% |
| Private for-profit 4-year | 782,814 | 770,488 | -1.6\% | 810,930 | 5.2\% | 817,244 | 0.8\% | 828,875 | 1.4\% |
| PABs | 1,051,577 | 1,041,997 | -0.9\% | 979,529 | -6.0\% | 913,848 | -6.7\% | 892,782 | -2.3\% |
| Public 2-year | 5,070,752 | 4,914,479 | -3.1\% | 4,418,882 | -10.1\% | 4,057,987 | -8.2\% | 4,079,830 | 0.5\% |
| Unduplicated Student Headcount (All Sectors) | 18,154,038 | 17,944,635 | -1.2\% | 17,511,906 | -2.4\% | 16,963,053 | -3.1\% | 16,878,602 | -0.5\% |

## UNDERSTANDING THE NUMBERS

Table 1 provides counts of spring term enrollments submitted to the Clearinghouse by late-April of each year. Enrollments represent one student in one institution and thus would count twice a student enrolled simultaneously at two institutions (concurrent enrollment). The unduplicated headcount provides the number of unique students with no double-counting. This figure can be used to determine the percentage of concurrent enrollments in any given year. In each term, fewer than 2 percent of total enrollments can be accounted for by students enrolling in more than one institution.

Institutional sector designations are based on IPEDS and Carnegie Classifications. While the classification largely follows IPEDS sector designations, where there are differences between IPEDS and Carnegie, we follow the Carnegie Classification. The 2018 Carnegie Classification for academic years 2018-19 through 2020-21 and the 2021 Carnegie Classification for academic years 2021-22 through 2022-2023. Less-than-two-year institutions have been aggregated with two-year institutions. Private nonprofit two-year and for-profit two-year enrollments are not shown in the table due to small counts (approximately $2 \%$ of total enrollments), but enrollments from these sectors are included in the overall totals.

As more and more institutions that previously focused solely on granting associate degrees have begun to offer bachelor's degree programs, there has been a surge in IPEDS reclassification of two-year institutions as four-year institutions, since IPEDS assigns two- or four-year designations based on program offerings. However, many of these reclassified institutions still confer most awards at the associate degree level. These institutions are considered primarily associate degree granting baccalaureate institutions (PABs). Additional notes on data and coverage are included at the end of the report.

Table 2. Estimated National Enrollment by Institutional Sector and Program Level: 2019 to 2023

| Sector | Program Level | Spring 2019 | Spring 2020 |  | Spring 2021 |  | Spring 2022 |  | Spring 2023 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## UNDERSTANDING THE NUMBERS

Table 2 provides enrollment counts by program level. The other undergraduate category includes undergraduate certificate/diploma, teacher preparation and special noncredential programs that have been classified by institutions as undergraduate programs, as well as enrollments that are not part of any structured program and missing program level data. The graduate/professional category includes post-baccalaureate certificate, master's degree, doctoral degree, first-professional degree, graduate/ professional certificate, and special non-credential programs that have been specifically classified by institutions as graduate-level programs.

Table 3. Estimated National Enrollment by Institutional Sector and Enrollment Intensity: 2019 to 2023

| Sector | Enrollment Intensity | Spring 2019 <br> Enrollment | Spring 2020 |  | Spring 2021 |  | Spring 2022 |  | Spring 2023 |  |

## UNDERSTANDING THE NUMBERS

Table $\mathbf{3}$ provides enrollment counts by the enrollment intensity of the student. The part-time category includes enrollments reported to the Clearinghouse as threequarter time, half-time, and less-than-half-time. Enrollment intensity is defined by the institution and based on the earliest data submitted for a student in any given term. As a result, the intensity generally reflects the student's intended workload at the beginning of the term. Less-than-two-year institutions have been aggregated with twoyear institutions. Private nonprofit two-year and for-profit two-year enrollments are not shown in the table due to small counts ( $2 \%$ of total enrollments), but enrollments from these sectors are included in the overall totals.

Table 4. Estimated National Enrollment by Institutional Sector and Age Group: 2019 to 2023

| Sector | Age Group | Spring 2019 <br> Enrollment | Spring 2020 |  | Spring 2021 |  | Spring 2022 |  | Spring 2023 |  |

## UNDERSTANDING THE NUMBERS

Table 4 includes all spring enrollments reported to the Clearinghouse, including students enrolled in non-credential programs. Student age is calculated as of the first day of the term (a date specific to the institution). Less-than-two-year institutions have been aggregated with two-year institutions. Private nonprofit two-year and forprofit two-year enrollments are not shown in the table due to small counts ( $2 \%$ of total enrollments), but enrollments from these sectors are included in the overall totals. Additional notes on data and coverage are included at the end of this report.

Table 5. The Average Age of Students by Program Level, Institutional Sector, and Enrollment Intensity: 2019 to 2023

| Program Level | Sector | Average Age (Years) |  |  |  |  |  |  |  |  |  |

## UNDERSTANDING THE NUMBERS

Table 5 provides the average age of students by program level, sector, and enrollment intensity. Dual enrollees (under age 18) are included. A student's age is determined as of the first day of his or her enrollment in the current term. The first date of enrollment can vary depending on the academic term used by the institution. The part-time category includes enrollments reported to the Clearinghouse as three-quarter time, half-time, and less-than-half-time. Enrollment intensity is defined by the institution and based on the earliest data submitted for a student in any given term.

Table 6. The Median and Average Ages of Students by Program Level, Institutional Sector, and Gender: 2019-2023

## UNDERSTANDING THE NUMBERS

 date of enrollment can vary depending on the academic term used by the institution. Additional notes on data, coverage, and imputation of gender are included at the end of the report.

## UNDERSTANDING THE NUMBERS

Table 7 provides enrollment counts by gender. Institutions reported student gender to the Clearinghouse for 75 percent of all students. Gender was imputed for an additional 20 percent of the students, based on first name for all other students. Less-than-two-year institutions have been aggregated with two-year institutions. Private nonprofit two-year and for-profit two-year enrollments are not shown in the table due to small counts (approximately $2 \%$ of total enrollments), but enrollments from these sectors are included in the overall totals. Additional notes on data, coverage, and imputation of gender are included at the end of the report.

## UNDERSTANDING THE NUMBERS

Table 8a provides enrollment counts by the state where the institution is located. Institutions that span multiple states and institutions that operate primarily online have been included in a separate line called "multi-state or POI." Enrollments in these institutions are not included in any other individual states.

* States where inconsistent data submissions across years make enrollment estimates less accurate: LA, MS, UT, WA, WV (Public two-year); KS (Public four-year); and TX (Other).

## UNDERSTANDING THE NUMBERS

year-over-year variability or small enrollment sizes but are included in state total enrollments. Institutions that span multiple states and institutions that operate primarily online have been included in a separate line called "multi-state or POI." Enrollments in these institutions are not included in any other individual states.

Term Enrollment

## UNDERSTANDING THE NUMBERS

 states and institutions that operate primarily online have been included in a separate line called "multi-state or POI." Enrollments in these institutions are not included in any other individual states.

* States where inconsistent data submissions across years make enrollment estimates less accurate: LA, MS, UT, WA, WV (Public two-year); KS (Public four-year); and TX (Other).

Term Enrollment

## UNDERSTANDING THE NUMBERS

Table 9 provides college enrollment totals disaggregated by Classification of Instructional Program (CIP) codes. The table excludes the following CIP codes, each of which had total enrollments of less than 5,000: 25 (Library Science), 28 (Reserve Officer Training Corps), 32 (Basic Skills), 33 (Citizenship Activities), 34 (Health-Related Knowledge and Skills), 35 (Interpersonal and Social Skills), 36 (Leisure and Recreational Activities), 37 (Personal Awareness and Self-Improvement), 41 (Science Technologies/Technicians), 46 (Construction Trades), 48 (Precision Production), 53 (High School/Secondary Diplomas and Certificates), 60 (Residency Programs).

|  | Missing Gender | 13,133 | 10,695 | -18.6\% | 11,377 | 6.4\% | 13,357 | 17.4\% |

## UNDERSTANDING THE NUMBERS

Table 12 provides spring freshman enrollment counts disaggregated by gender and institutional sector. Freshman students are those with no previous enrollment or completion records across the Clearinghouse universe of higher education institutions since 1993, unless the previous enrollment record is prior to age 18 or graduation from high school (dual enrollment). The spring freshmen counts provided in this report are unweighted, not accounting for the Clearinghouse data coverage rates. Freshmen at private for-profit four-year and private two-year institutions are included in the total, although not shown here due to small student counts.

## Methodological Notes

## NATIONAL COVERAGE OF THE DATA AND WEIGHTING FOR THIS REPORT

As of fall 2021, institutions actively submitting enrollment data to the Clearinghouse account for 97 percent of all enrollments at Title IV, degree-granting institutions in the U.S. Because Clearinghouse participation grew over the period covered by this report, and because coverage of institutions (i.e., percentage of all institutions participating in the Clearinghouse) is not 100 percent for any individual year, weights were applied by institutional sector and state to better approximate enrollments at all institutions nationally. Using all IPEDS Title IV, degree-granting institutions as the base population, weights for each institutional sector and state were calculated using the inverse of the rate of enrollment coverage for that sector and state in the relevant year. Given the unavailability of fall 2022 IPEDS enrollments at the time of publication, fall 2021 IPEDS enrollments were used as the basis for calculating the fall 2022 Clearinghouse data coverage rates, and these rates were applied to estimate the spring 2023 enrollments. However, in the special analysis of spring freshman enrollment, the reported data are unweighted, unadjusted for data coverage rates (Table 12). For detailed statistics on enrollment coverage, as well as other aspects of Clearinghouse data, view "Working With Our Data."

## DIFFERENCES FROM IPEDS DATA

National Student Clearinghouse data are non-adjudicated, administrative data that come directly from college and university registrars. The data differ from IPEDS survey data in several important ways:

1. Term definition: IPEDS does not conduct a spring enrollment survey, so there are no comparable IPEDS numbers for the spring. For Clearinghouse reporting, institutions provide the start- and end-dates for each enrollment, rather than formally designating fall or spring terms. Spring terms included in the Current Term Enrollment Estimates account for the academic terms that:
a) began between January 15 and March 31, inclusive OR
b) ended between February 15 and April 30, inclusive OR
c) began before January 15 AND ended after April 30.
2. Degree-granting status: When referencing IPEDS enrollment counts, it is important to distinguish counts limited to degree-granting institutions from those that also include non-degree-granting institutions. NCES publishes both of these counts in IPEDS First-Look Reports. The Clearinghouse counts in this report are limited to Title IV, degree-granting institutions.
3. Enrollment status changes: Institutions submit data to the Clearinghouse throughout a given term, capturing changes in enrollment status from one submission to the next. The counts in this report include all students whose institution submitted at least one enrollment record showing the student enrolled as either full time, threequarters time, half time, or less than half time during the term. For IPEDS reporting, an institution generally counts a student according to the student's enrollment status as of the institution's IPEDS census date.

## PRIMARILY ONLINE INSTITUTIONS (POIs), MULTI-STATE INSTITUTIONS

Primarily online institutions (POIs) were identified based on the distance education survey items in the IPEDS fall 2020 enrollment survey. Any institution where the primary campus reports more than 90 percent of its students enrolled exclusively in distance education courses before the COVID-19 pandemic began is considered a POI. This applies as long as the entire institution-rather than a single branch campus-meets this enrollment threshold. Using this method, there were between 28 and 31 institutions identified depending on the year. POIs are predominantly for-profit four-year, multistate institutions. Beginning with the fall 2022 CTEE report, POIs have been grouped with multistate institutions in the CTEE report series. Prior to the fall 2022 CTEE report, some POIs that were not already designated as multistate institutions by the Research Center had been included in state totals.

Multi-state institutions are those with at least one branch campus operating in a different state from the main campus as reported in the fall 2021 IPEDS Institutional Characteristics Survey data.

## INSTITUTION SECTOR RECLASSIFICATIONS, PRIMARILY ASSOCIATE DEGREE GRANTING BACCALAUREATE INSTITUTIONS (PABs)

There has been a growing number of sector reclassifications by IPEDS from associate colleges to four-year institutions, which are considered Primarily Associate Degree Granting Baccalaureate Institutions (PABS). PABs can be identified using the institutional category variable from the IPEDS Institutional Characteristics survey, which relies on both program offerings and degrees awarded. Alternatively, PABs can be identified based on the Carnegie Classification of Institutions of Higher Education (2021), which similarly relies on program offering (there must be one bachelor's-level program offered) and degrees awarded. The IPEDS methodology identifies more PABS than the Carnegie methodology. This is because Carnegie excludes tribal colleges and special focus colleges (e.g., those focused on health sciences, arts, or religious instruction) from its PAB designation. We elect to use the more conservative Carnegie Classification. PABs carry Carnegie Classifications of either 14 (Associate Dominant) or 23 (Mixed Baccalaureate/Associate). In general, Institutions with a 14 designation award $90 \%$ or more of degrees at the associate level while those with a 23 designation award $51 \%$ to $90 \%$ of degrees at this level.

This report utilizes the 2018 Carnegie Classification for academic years 2018-2019 through 2020-2021 and the 2021 Carnegie Classification for academic years 2021-2022 through 2022-2023. While the classification largely follows IPEDS sector designations, where there are differences between IPEDS and Carnegie, we follow the Carnegie Classification. These discrepancies primarily affect PABs (see above) as well as 46 institutions considered four-year institutions by IPEDS but two-year institutions by Carnegie. Most institutions in the latter case (40) are public institutions. Institution sector designations are applied for the specific year in which reclassifications occurred.

## STUDENTS WITHOUT VALID IDENTIFIERS

Students without a valid identifier reported to the Clearinghouse were previously presumed to be international students and thus excluded from previous editions of the spring CTEE report. In recent years, more U.S. students have appeared in this category. In order to better reflect the full population of students reported to the Clearinghouse, all students without a valid identifier, including U.S. and international, are now included in the spring CTEE report series. We have re-estimated previously
published results going back to 2019, which are reflected in the current edition. This is a large change given that these students increased steadily, from 864,000 in 2019 to 1,053,000 in 2023 (growing from $4.7 \%$ to $6.1 \%$ of the national total). This improved estimation was first introduced in the Fall 2022 CTEE Expanded Edition report.

## FRESHMAN ENROLLMENT

Freshman students are those with no previous enrollment or completion records across the Clearinghouse universe of higher education institutions since 1993 unless the previous enrollment record is prior to age 18 or graduation from high school (dual enrollment). In addition, this report removes graduate-level credential-seeking students from all years who were previously erroneously flagged as freshmen. The freshman counts provided in this report are unweighted, not accounting for the Clearinghouse data coverage rates.

## MAJOR FIELD OF STUDY

Major field of study across all years has been harmonized to reflect the 2020 NCES Classification of Instructional Programs (CIP) at the two-digit CIP family level.

## GENDER IMPUTATION

Institutions reported student gender to the Clearinghouse for about three-quarters of all students included in this report. The gender for an additional 20 percent of the students was imputed using a table of name-gender pairs that the Research Center developed using data publicly available from the Census Bureau and the Social Security Administration as well as the institution-reported data. The imputation used only those pairs in which the name had at least two instances and was associated with a single gender in at least 95 percent of the instances. The imputation is accurate in 99.6 percent of the cases where gender was reported by institutions. For a detailed document describing this approach, see "Working With Our Data" page.

## ACKNOWLEDGEMENTS

The authors thank National Student Clearinghouse Research Center staff members Jennifer Causey, Jeremy Cohen, Allyson Gardner, Sarah Karamarkovich, Hee Sun Kim, and Aaron Pevitz for their assistance with this publication.
