### All Institutional Sectors
**First-Time, Full-Time**

Figure 1 shows yearly success and progress rates for individuals who began college in Fall 2011 as full-time degree-seeking students. It shows the highest level of academic progress made by these students at the end of each subsequent academic year.

By the end of year four, 42.1 percent had completed a postsecondary credential, while 23.5 percent were no longer enrolled. By the end of year six, 63.1 percent had graduated, while 27.4 percent had left college without earning a credential.

The outcome categories are modeled after those used in the Student Achievement Measure (SAM), and can be used by participating institutions for benchmarking purposes.

More detailed notes on the cohort and outcome definitions are included at the end of this report.

Four-Year For-Profits
First-Time, Full-Time

Figure 7 shows yearly success and progress rates for individuals who began college in Fall 2011 as full-time degree-seeking students at four-year for-profit institutions.

By the end of year four, 30.8 percent had completed a postsecondary credential, while 50.5 percent were no longer enrolled. By the end of year six, 39.0 percent had graduated, while 53.4 percent had left college without earning a credential.

Note that most of the Year 2 and Year 3 completions in the for-profit sector are for associate degrees.
Four-Year For-Profits
First-Time, Part-Time

Figure 8 shows yearly success and progress rates for individuals who began college in Fall 2011 as part-time degree-seeking students at four-year for-profit institutions.

By the end of year four, 22.2 percent had completed a postsecondary credential, while 54.0 percent were no longer enrolled. By the end of year six, 29.4 percent had graduated, while 60.7 percent had left college without earning a credential.

Note that most of the Year 2 and Year 3 completions in the for-profit sector are for associate degrees.

Outcome Definitions for Yearly Success and Progress Rates

Students are counted in only one outcome category per year (the highest ranking outcome they achieve in any particular year). The outcome categories are defined below, listed in hierarchical order. Academic years run from July 1 through June 30.

**Graduated from Starting Institution**
Student received a certificate or degree from the same institution in which she started college. Once a student completes a credential at the starting institution, the student will be counted in this category in all subsequent years since this is the highest ranking outcome in this model.

**Transferred & Graduated from Other Institution**
Student did not receive a credential from the starting institution, but did receive a certificate or degree from a different institution. Student will be counted in this category in all subsequent years unless the student eventually completes a credential at the starting institution.

**Enrolled at Starting Institution**
Student has not yet received a certificate or degree, but is still enrolled at the starting institution.

**Transferred and Enrolled at Other Institution**
Student has not yet received a certificate or degree, but is still enrolled in college at an institution other than the starting institution.

**Not Enrolled**
Student had no college enrollments during the academic year in question. This is not a terminal outcome. In other words, a student can be counted as *not enrolled* in one academic year, but then counted as enrolled in a subsequent year if the student returns to college.

For two-year institutions only, the *not enrolled* category is further disaggregated into the following two categories:

**Transferred and No Longer Enrolled**
Student had no enrollments for the academic year in question, but in a previous academic year, had transferred to an institution other than the starting institution.

**Never Transferred and Not Enrolled**
Student had no enrollments during the academic year in question, and had never transferred to an institution other than the starting institution.

**Note on Certificates**
Unlike the Student Achievement Measure, this snapshot includes postsecondary certificates in graduation counts for four-year institutions. The inclusion of certificates increases six-year graduation counts by 1.6 percent at four-year publics, 0.6 percent at four-year private nonprofits, and 4.8 percent at four-year for-profits.
About the Cohort for Yearly Success and Progress Rates

This Snapshot Report is based on the cohort of fall 2011 entering students extracted for NSC Signature Report #14: A National View of Student Completion Rates. There were two major changes from prior versions of the report on completion rates that pertained to cohort definitions:

1) **All-years look-back for prior enrollments**: Data limitations in previous reports limited our ability to search for previous enrollments in order to establish first-time status, to within four years prior to the cohort year. Beginning with this year’s report, students with any prior non-dual enrollment, regardless of how far back in the Clearinghouse data that enrollment occurred, were removed from the cohort as non-first-time students.

2) **Exclusion of current dual enrolled students**: Students who were 17 years old or younger during the fall 2011 semester were excluded from the dataset (i.e., current dual enrollment students). This was done to ensure that those who were simultaneously attending high school and post-secondary classes were not considered first-time college students.

Detailed notes on the cohort definitions, including a discussion of how the above changes impacted completion rates, can be found in the methodological notes of the Signature Report: [https://nscresearchcenter.org/signaturereport14/#AppendixA](https://nscresearchcenter.org/signaturereport14/#AppendixA)
